

## **What :**

**The Appointment Clock is a tool to organise partners in a class.**

## **When:**

**Useful for co-operate learning opportunities, pair/share activities.**

## **How :**

**Each student is given an appointment clock. They walk around and ask a different person to make appointments on each hour. Write the person's name on the given line for that time.**

**Teacher can now ask: "Find your 11:00 appointment and . . .(given task)." For odd numbers some groups could have three participants per appointment.**
